### 2024 Learning Collaborative Innovative Ways to Leverage Informatics for Quality Improvement

David Kaelber, MD, PhD, MPH Chief Health Informatics Officer The MetroHealth Systems

Tyler Barnett, MHSA Director, Value Improvement Analytics University Hospitals

Joel Davidson, MD Locust Care Pediatric Care Group Akron Children's Hospital Co-Chair, BHP Children's Leadership Team

Alex Rennick, Director Research Data Science & Analytics Center for Community Health, Cleveland Clinic

Setter Health Partnership

### 2024 Learning Collaborative Innovative Ways to Leverage Informatics for Quality Improvement

### Session Objectives

- Learn how informatics and quality improvement strategies have been used to solve key problems in the healthcare sector.
- Explain informatics and quality improvement methods that can be generalized to solve problems in the healthcare sector.
- Understand new developments in the field of informatics, including Cosmos, and how they may be leveraged for regional health improvement.

### Dynamic Defects in Chronic Condition Management System

Tyler Barnett, MHSA

Director Value Improvement Analytics 10/25/2024

#### **Objectives**

- Specify the problem(s) in chronic condition management being addressed prior to solutioning
- Techniques / approaches taken to work through these problems
- Ongoing Lessons Learned

#### **Problem Clouds**

#### System Design Flaws & Fragmented Care Pathways

Scarce time, resources, and communication logistics

Information Overload / Burnout

75% QI Projects Fail

Quality Improvement Infrastructures largely lacking

Competing Priorities / Ideas

| Condition    | Count   | Avg PMPY (All LOB)    |
|--------------|---------|-----------------------|
| COPD         | 42,710  | \$18,209 (1.5x w/ BH) |
| CHF          | 22,786  | \$31,386 (1.4x w/ BH) |
| CKD          | 54,136  | \$20,647 (1.5x w/ BH) |
| Diabetes     | 45,657  | \$18,505 (1.6 w/BH)   |
| Hypertension | 121,460 | \$14,449 (1.65 w/ BH) |

#### **Strategic Tactics**

#### **Defects In value:**

- Partner Key Clinical, Operational SMEs, & Data Scientists
- 2. Define 'Excellence'
- 3. Declare Idealized Measurements
- 4. Gather Data & Curate Datamarts
- 5. OODA Loop (Orient, Observe, Decide, Act)
- 6. Pilot Interventions
- 7. Assess Data
- 8. Scale

- 1. % of undiagnosed patients
- 2. % of diagnosed patients without Wellness Visit in prior year
- % of diagnosed patients with behavioral/mental health screening and follow up
- 4. % of patients on guideline directed medication therapy
- 5. % of patients with pharmacy consult <u>Fractal Management System</u>
- 1. Declare Objectives & Key Results & Hardwire Next

Action for each defect

- 2. Curate Enabling Infrastructure
- 3. Engage and Connect
- 4. Report Transparently & Ensure Shared Accountability

#### **Lessons Learned**

- 1. Maintain grounded in purpose when adding new team(s)
- 2. Data Distribution and QI visualizations are a requirement
- 3. Continuous measurement cycles are ideal
- 4. Human Factors are critical & require more attention
- 5. Simplify, communicate, and re-establish the management system
- 6. Pilot with intention to scale regardless of outcome
- 7. Coordinated Feedback Loops & Communication Plans are critical

### Geospatial Data for Localized Community Interventions Alex Rennick 2024-10-25

### Increasing granularity

ED utilization by zip code

ED utilization by block

### Increasing depth and accuracy

Ten-minute drive time to identify communities local to our facilities

Estimated percent of population by block seen by Cleveland Clinic

### Using Public data

Estimated Food Stamps by Census Block

# **E** Cleveland Clinic

**Every life deserves world class care.** 

### Innovative Ways to Leverage Epic – Akron Children's Hospital

#### **Our Mission**

To improve the health of children, teenagers and young adults through excellence in patient care, education, research, advocacy and community partnerships.

#### **Our Vision**

Akron Children's will be the most trusted, inclusive and accessible pediatric health system in the communities we serve.

#### **Our Promises**

- To treat every child as we would our own.
- To treat others as they would like to be treated.
- 3. To turn no child away.

### High Quality Primary Care Pediatrics

### Well Care Initiatives

6 visits by 15 months

3-21 year with well visit in last year

### **Care Standardization**

Standard well visit smartsets

Age based templates

Lead testing

Measuring blood pressure

Asthma Control Assessment

### **High Quality Well Care**

problems, and are growing and developing in a satisfactory fashion. Developmental, psychosocial, and chronic

from preventive care visits. Additional visits also may become necessary if circumstances suggest concerns.

disease issues for children and adolescents may require more frequent counseling and treatment visits separate

These recommendations represent a consensus by the American Academy of Pediatrics (AAP) and Bright Futures.

The AAP continues to emphasize the great importance of continuity of care in comprehensive health supervision

#### **Recommendations for Preventive Pediatric Health Care** Bright Futures/American Academy of Pediatrics

and the need to avoid fragmentation of care.

Each child and family is unique; therefore, these Recommendations for Preventive Pediatric Health Care are designed Refer to the specific quidance by age as listed in the Bright Futures Guidelines (Hagan JF, Shaw JS, Duncan PM, eds. for the care of children who are receiving nurturing parenting, have no manifestations of any important health

Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents. 4th ed. American Academy of Pediatrics; 2017).

The recommendations in this statement do not indicate an exclusive course of treatment or serve as a standard of medical care. Variations, taking into account individual circumstances, may be appropriate.

The Bright Futures/American Academy of Pediatrics Recommendations for Preventive Pediatric Health Care are

updated annually.

1. If a child comes under care for the first time at any point on the schedule, or if any items are not accomplished at the suggested age, the schedule should be brought up to date at the earliest possible time. A prenatal visit is recommended for parents who are at high risk, for first-time parents, and for those who request a conference.

The prenatal visit should include anticipatory guidance, pertinent medical history, and a discussion of benefits of breastfeeding 6. and planned method of feeding, per "The Prenatal Visit" (<u>https://doi.org/10.1542/peds.2018-1218</u>). 3. Newborns should have an evaluation after birth, and breastfeeding should be encouraged (and instruction and support

should be offered).

4. Newborns should have an evaluation within 3 to 5 days of birth and within 48 to 72 hours after discharge from the hospital to include evaluation for feeding and jaundice. Breastfeeding newborns should receive formal breastfeeding evaluation, and their mothers should receive encouragement and instruction, as recommended in "Policy Statement: Breastfeeding and the Use of Human Milk" (https://doi.org/10.1542/peds.2022-057988). Newborns discharged less than 48 hours after delivery must be examined within

48 hours of discharge, per "Hospital Stay for Healthy Term Newborn Infants" (https://doi.org/10.1542/peds.2015-0699) 5. Screen, per "Clinical Practice Guideline for the Evaluation and Treatment of Children and Adolescents with Obesity" (https://doi.org/10.1542/peds.2022-060640),

Screening should occur per "Clinical Practice Guideline for Screening and Management of High Blood Pressure in Children and Adolescents" (https://doi.org/10.1542/peds.2017-1904). Blood pressure measurement in infants and children with specific risk conditions should be performed at visits before age 3 years.

7. A visual acuity screen is recommended at ages 4 and 5 years, as well as in cooperative 3-year-olds. Instrument-based screening may be used to assess risk at ages 12 and 24 months, in addition to the well visits at 3 through 5 years of age. See "Visual System Assessment in Infants, Children, and Young Adults by Pediatriciars' (https://doi.org/10.1542/peds.2015-3596) and 'Procedures 13. Screening should occur per 'Identification, Evaluation, and Management of Children With Autism Spectrum Disorder' for the Evaluation of the Visual System by Pediatricians" (https://doi.org/10.1542/peds.2015-3597).

8. Confirm initial screen was completed, verify results, and follow up, as appropriate. Newborns should be screened, per "Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs" (https://doi.org/10.1542/peds.2007-2333)

9. Verify results as soon as possible, and follow up, as appropriate.

10. Screen with audiometry including 6,000 and 8,000 Hz high frequencies once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 21 years. See "The Sensitivity of Adolescent Hearing Screens Significantly Improves

by Adding High Frequencies" (https://www.sciencedirect.com/science/article/abs/pii/S1054139X16000483). 11. Screening should occur per "Incorporating Recognition and Management of Perinatal Depression Into Pediatric Practice" (https://doi.org/10.1542/peds.2018-3259).

12. Screening should occur per "Promoting Optimal Development: Identifying Infants and Young Children With Developmental

Disorders Through Developmental Surveillance and Screening" (https://doi.org/10.1542/peds.2019-3449).

(https://doi.org/10.1542/peds.2019-3447).

### Focus on Well Care

Percentage of Patients with 6 Well Visits by 15 Months

Akron Children's Hospital

### Focus on Well Care

Patients 3-21y With Well Visit in Past 12 Months

Akron Children's Hospital

> Better Health Partnership Learning Collaborative October 2024

# **MetroHealth and Epic**

#### System Overview

- 1 tertiary care academic hospital
- 1 behavior health hospital
- 2 community hospitals
- 4 emergency departments
- 27 health centers/13 schools
- 400+ resident/fellow physicians
- 1,000+ medical staff/2,100+ nurses
- 25,000 inpatient stays/year
- 140,000 ED visits/year
- 1,500,000 outpatient visits/yr
- Recovery Resources, Corrections Care, Foster Care, Hospital @ Home, Dental Care
- Institute for H.O.P.E.<sup>2</sup>, High School on Campus
- Level I Trauma Center
- Only OH Adult & Pediatric Trauma Burn Center
- Affiliated with CWRU
- Cleveland's/Cuyahoga Country's public/safetynet health care system

#### **Epic Implementations**

- 1999 Ambulatory EHR (EpicCare w/ Cadence, Prelude, & Resolute)
- 2004 EHR in ED (ASAP)
- 2009 Inpatient EHR (Epic w/ Inpatient Willow and Beacon)
- 2011 CareEverywhere, e-Rx, MyChart, Nurse Triage
- 2012 Epic Enterprise Contract, MU Stage 1
- 2013 BCMA, EpicCare Link, Welcome
- 2014 ADT, Beaker, Bed Tracking, Anesthesia, OpTime, Research, Resolute Hospital Billing and SBO
- 2015 Kaleidoscope
- 2017 Stork, LGBT module
- 2018 Infection Control, Clinical Case Management
- 2020 MyChart Bedside, Transfer Center, UniteUs
- 2021 Radiant, Ambulatory Willow, PM&R
- 2022 Behavior Health Module
- 2023 Compass Rose, Bones, Hello World, Payer Platform
- 2024 Epic 2023 (Feb), Hyperdrive, Financial Assistance, Maternal Care Companion

<u>Total EHR data</u>

- 1.6 million patients
- 25 million visits
- 200 million labs/pathology
- 1 million imaging studies
- 25 years of data in Epic

1<sup>st</sup> public health care system in US to install Epic in the outpatient setting (1999)!!!
1<sup>st</sup> public health care system in US with Epic to achieve HIMSS Stage 7 EMRAM Ambulatory & Hospital recognition (2014) and revalidation (2017, 2020, and 2023)!!!

1<sup>st</sup> public health care system in the US with Epic to achieve HIMSS Enterprise Davies award (2015)!!!

# The MOST cost effective intervention for health – IMMUNIZATIONS!!!!!!

- The "number needed to vaccine" (i.e. vaccines needed to be given to prevent one illness can range from a couple hundreds to <10).
- Most vaccines have a NET POSITIVE financial impact.
- Vaccines only work if they are injected!!!!

### **Strategic Approach to Improving Immunizations**

- 1. Clinical Decision Support build all ACIP (Advisory Committee on Immunization Practices) approved immunization rules into your EHR.
- 2. Registry create a registry to determine your eligible patients due/overdue for immunizations.
- 3. Alerts show immunization reminder to the care team (at the point of care) and to patients/parents through the patient portal.
- *4. Reporting* make it easy for everyone to see population level immunization rates.
- 5. Outreach use multi-mode (texting, calling, personal health record reminders, letters, post-cards, email) to remind due/overdue patients/parents.
- 6. Scheduling make immunization scheduling easy (self-scheduling).

### **Immunization Self-Scheduling Outcomes**

### Appointments self-scheduled per month

MetroHealth

In aggregate, patients have used our functionality to selfschedule **17,073 immunization appointments.** (Jan 2023 – May 2024)

We saw a **spike** in selfscheduled appointments at the start of the **respiratory season** as adult patients sought their influenza, COVID, and RSV optional vaccines.

### A New Approach To Measuring Healthcare Quality in Northeast Ohio Over a DECADE in the Making

#### David C Kaelber, MD, PhD, MPH, FAAP, FACP, FAMIA, FACMI

Board Certified in Clinical Informatics

Professor of Internal Medicine, Pediatrics, and Population and Quantitative Health Sciences Case Western Reserve University Northern Ohio CTSC Informatics Lead

Chief Health Informatics Officer and Vice-President of Health Informatics and Patient Engagement Technologies Director of the Center for Health Informatics and Patient Engagement Director of the Center for Clinical Informatics Research and Education The MetroHealth System

> Better Health Partnership Learning Collaborative October 2024

### CREATING THE LARGEST, DE-DUPLICATED PLATFORM EVER TO ANALYZE QUAITY AND HEALTH TRENTS IN NORTHEAST OHIO!!!!!!!!

### CREATING THE LARGEST REPOSITOR#, Y OF PATIENT EHR DATA

### Creating the largest repository of

Participating Health Systems :Contribute Limited Data Set

Get Access:

- Improve Patient Care
- Better understand health and disease
- Can query down to the zip code level
- Can bring in externally linked zip code/county data
- Goes back to 2023 (and in many cases earlier)

Cleveland Clinic, MetroHealth, University Hospitals of Cleveland, and OCHIN (for FQHCs) and other regional healthcare systems.

CASE WESTERN RESERVE UNIVERSITY School of Medicine

### **Cosmos and Cuyahoga County**

MetroHealth

- 1. Self-service querying tool hosted the Epic corporation (over 50% of Epic customers)
- 2. 7 different "data models":
  - a. Admissions
  - b. ED Encounters
  - c. Encounters
  - A Organ Transplant Episodes

Cuyahoga Country: 866,782 patients in Cosmos and 1,229,182 patients in US Census = 71% of county population

35

#### Information

- 3. Can look at data by:
  - a. Bar graphs/Line graphs
  - b. Tree maps, Donut graphs, Pie charts
  - c. Geomapping (down to zip code)
  - d. Tables and Crosstabs

CASE WESTERN RESERVE UNIVERSITY School of Medicine

### **Cosmos SDOH related variables** (collected and imputed)

### **Cuyahoga Country Lead Screening Example**

37

#### Patients 1-3 y/o in Cuyahoga county with abnormal lead level

MetroHealth

What will be the first Better Health Partnership activity to utilize Cosmos?

Will someone be presenting on using Cosmos at the NEXT Learning Collaborative?

## Thank You

# Afternoon Feedback
